Comments sought on Magnolia Bridge

SEATTLE -- The city is seeking comments on the scope of the environmental impact statement for the **Magnolia Bridge** replacement. The 3,000-foot structure connects the 15th Avenue West/Elliott Avenue West corridor to **Magnolia** along the extended alignment of West Garfield Street. Landslides and earthquakes have damaged the **bridge**, and the cost of ongoing repairs would approach the cost of replacing the **bridge**. The city is evaluating three different alignment alternatives, and a no-action alternative, as part of the EIS. Comments may be made until Sept. 10 to Kirk T. Jones, Project Manager, Seattle Department of Transportation, 700 Fifth Ave., Suite 3900, Seattle, WA 98104-5043. More information can be found at www.seattle.gov/transportation/magbridgereplace.htm
